Holographic 	N.A.				

Disclaimer:

These color cross references are only intended as a guide. The above are only to be interpreted as being the nearest Pantone® reference and not intended as a direct match. They are based on the spot color derivation of the Pantone®. Reproducing the color using the above CMYK references is dependent on the variability of the output device and inks, and the available color gamut from the device. For example, certain oranges and greens are outside the color gamut of a 4 color printer.
